

iVisual is the most powerful, sophisticated and advanced real estate and retail digital display system in the world.

The iVisual solution is displayed upon sun readable video screens. These come in the form of plasma, LCD, televisions, projectors and video walls.

Picture Perfect

iVisual is using the top of the range commercial grade monitors. Our monitors are designed to address issues with health, direct sun light, 24/7 use, safely and they look great.

Custom iVisual Server

A custom built media PC will be installed on the premises which will run the displays and it will be linked to the central server at iVisual. This server will hold all of your content for you. You can upload your content manually or keep your content refreshed on a schedule to suit you.

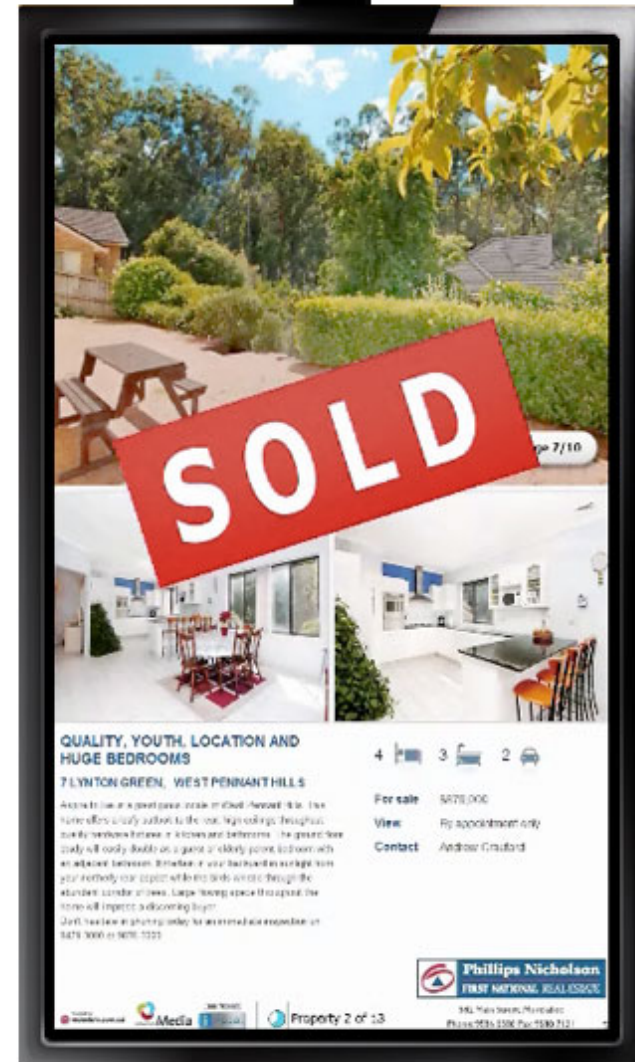

Access Content Anywhere

The beauty of the iVisual system is how easy it is to maintain. You can access the content remotely from anywhere in the world with an internet connection. Content can be created or changed by simply dragging and dropping files into the online platform and changes will be live in a matter of minutes.

Automatic Software Updates

Through our ongoing research and development we provide you with software enhancements updated automatically. There is no IT involvement at all and with a 99.98% up time and reliability, plus total security, our product and our team will service all your display needs all the time.
